

Personal Watercraft the Safe and Responsible Way

- **MUST** wear a life jacket while on or around any personal watercraft.
- Only one (1) person at a time on or in a kayak.
- At least two (2) people need to carry the kayak or canoe to and from the water.
- Kayaks might tip over if you lean too much to either side when in the water.
- If you are not skilled or experienced with any of the personal watercrafts or water toys please don't use them.
- If you should so happen to flip the Personal Watercraft over, stay free from the PW (personal watercraft), your life jacket will keep you afloat and get to safety as soon as possible. Retrieve the PW and paddle once you are safe.
- Never get in or out of the PW near any rocks or by dock.
- To get in or out of the PW, get into knee deep or less water and carefully balance the PW and you while getting in or out.
- While getting in or out of the PW, NEVER use the back of the seat as leverage for it's not made for this type of strain and will break.
- The paddles are for paddling only. Never swing or slam them for they will break.
- When storing PW, place upside down out of the water. Hang life jackets to dry and store paddles with the PW.
- ALWAYS BE SAFE AND RESPONSIBLE. ENJOY!!!!
- You will be responsible for returning the equipment you rented in the same working condition as it was given to you. If you have lost or damaged any items rented you will be responsible for their replacement or repair. This may be above and beyond your security deposit, and you will be expected to pay that bill.

I have read and understand the statements above and agree to comply with them all.

No Refunds.
